ABOUT COMPANY

The main advantage of the Inter Atletika Group of Companies is its own production with a design office and modern equipment that allows performing the most complex orders and constantly expanding and improving the product range and quality.

In 2006, the enterprise received an international certificate ISO 9001: 2015 on the Quality Management System of LLC «Company Sporttehnika», which is a member of the «Inter Atletika». The company in 2010 certified the products in compliance with the EN1176 European safety standards for children's playgrounds and EN16630 - for outdoor exercise machines.

The company is a constant supplier of products to customers to over 40 countries of the world.

CHILDREN AND SPORTS PLAYGROUNDS

We provide all assortment of children, sports and urban equipment for developing territories near parks, hotels, recreational zones, kindergardens, schools, military bases and etc.

OUR PROJECTS:

- Installation of children and sports playgrounds (more that 100 000 playgrounds installed)
- Installation and equipping all kinds of sports playgrounds for play sports (football, volleyball, basketball, etc)

Our production facilities are located in Ukraine, Chernihiv city. Keeping investing in factory modernization and development, we are proud to say that Inter Atletika products meet the best quality standards.

WE CONSTANTLY MAKE SURE WE HAVE:

- Up-to-date automatic equipment;
- Quality control at each production stage
- Qualified personnel;
- Modern technologies in the production process.

SAFETY OF EQUIPMENT

Inter Atletika equipment is designed and produced according to European safety standards.

We offer equipment, which meets high quality and safety standards.

Our equipment conforms safety standard EN1176:2017 for children playground equipment and EN16630:2015 for outdoor fitness equipment. Certification and tests are provided by TUV Rheinland specialists.

We use these safety standards during all process of design and manufacturing of our equipment. We use only first class materials and there is also quality control on every step of production to achieve the high-quality equipment during the maintenance of the wood, metal, welding, painting, assemble, packaging and delivery.

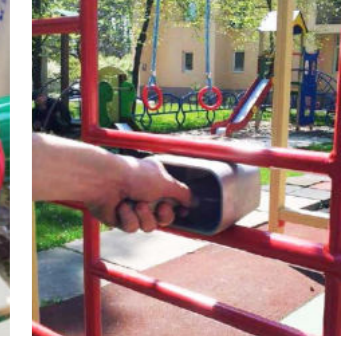

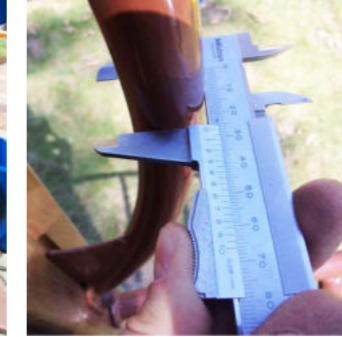

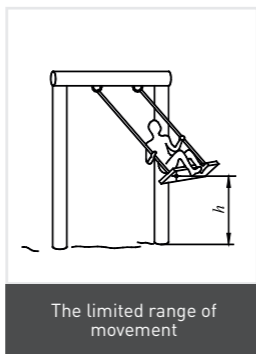

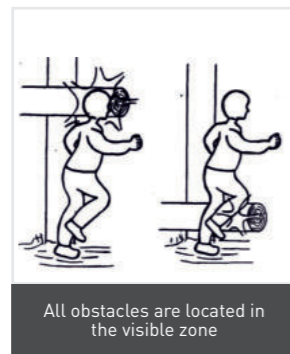

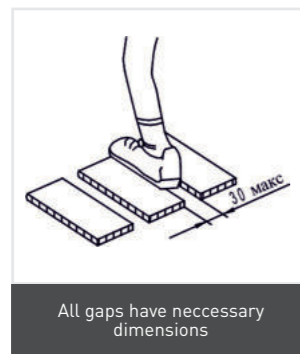

Certified equipment is the guarantee of safety for every used on the playground.

Also, except the quality of equipment, it has to be proped installed on the playground to prevent any injuries. We provide all kinds of technical manuals and share all our experience with our partners to have safety installation of our playgrounds.

Safety playground has to meet many levels of quality: design according with safety standards, high quality materials, modern production, proper installation and safety surface.

Safety standard describes all requirements for equipment on every step of it's life cycle: design, production, quality control, regular inspections and etc.

A lot of attention is being focused on technical dimensions, parameters and gaps of equipment: distances between stairs, angle of the slide, height level of the bars, dimensions of the fences and barriers, presence of safety bars on platforms and etc. For example, you can use only soft rubber seats and chains on the swings to prevent any injuries during it's movement. Also, all equipment has to be installed on the playground with respect to safety zones - it means, no other equipment could be situated in the movement space of other items.

Safe, quality and certified sports equipment - is the guarantee of safety use, trainings and high results of the training process.

There a lot of situations, when sports training equipment doesn't meet the requirements of the users: it starts to break, to luft and other cases.

Inter Atletika company produces high-quality certified equipment, which is confirmed by EN16630:2015 safety certificate.

All samples are being tested by safety experts: there are being checked mathematical integrity calculations and all elements are being checked with loading tests.

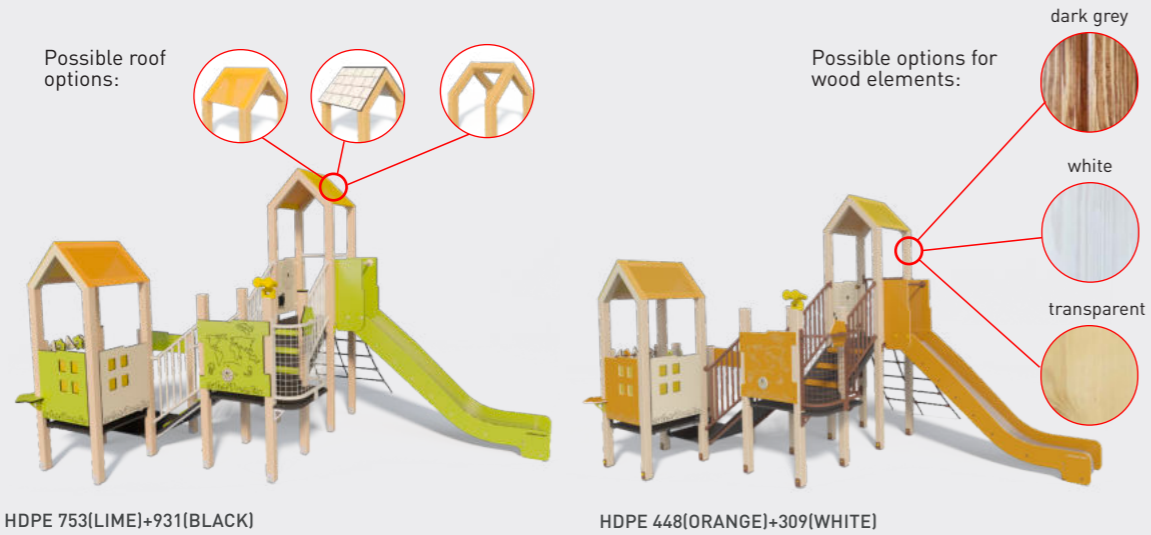

Inter Atletika equipment is being checked on all steps of it's life cycle: during production, before shipment to customer and after installation.

We use only high quality materials, our factory facility has only first-class production equipment, and we use all our 25-years experience in design and construction of sports equipments.

+Zn Metal parts can be covered with zink layer. It provides additional durability and anti-rust protection.

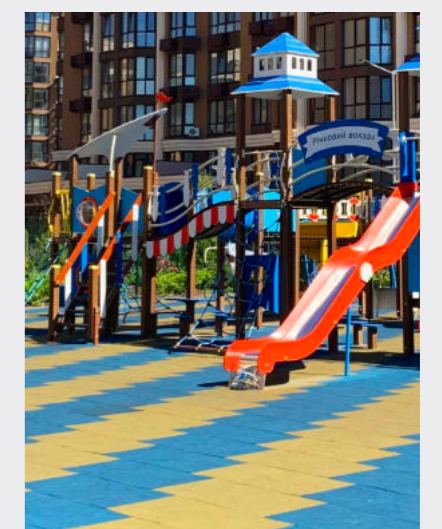

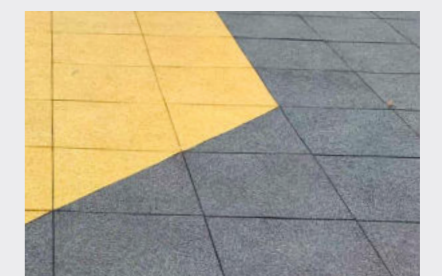

SAFETY SURFACES for children and sports playgrounds

Safety rubber is the obligatory part and the best surface to use on the any kind of playgrounds.

ADVANTAGES:

- long-time usage
- safety
- visual look
- suits for any kind of weather
- easy to maintain
- wide range of colours

RECOMMENDATIONS

FOR USE OF PROFESSIONAL KF EQUIPMENT

It is recommended to install these machines only on the playgrounds with limited access.

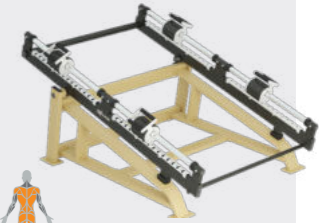

It is prohibited to allow children on these playgrounds.

Every playground has to have information stickers with information regarding safety, emergency and maintaining services.

SAFETY SURFACE FOR CHILDRENS AND SPORTS PLAYGROUNDS

SAFETY SURFACE IS ONE OF THE MOST IMPORTANT PARTS OF THE PLAYGROUNDS.

VISUAL EFFECT

it gives nice look to children and sports zone, and it provides design to the playground and it's surroundings.

QUALITY OF THE SURFACE

It serves to prevent injuries for the users during play and exercising activities, it extends the durability of the equipment and the playground itself, helps to keep it clean, safe and soft.

MODULAR PLASTIC TILES

This surface is made from pure polyethylene under high pressure with the addition of color pigments. This surface has high durability, UV resistant, high electrosafety, heat saving and etc.

You can use it on the playgrounds, near garages, warehouses, pools, territories of rest and fun activities.

POLYURETHANE SURFACE

Polyurethane surface is made from recycled rubber, EPDM rubber granules and polyurethane glues.

This play and safety surface has following characteristics:

- Wide colour range
- UV resistant
- High durability
- No joints
- Big term of usage
- Stable against natural wear
- Wateribility
- Low injury risk
- Easy to maintain

ARTIFICIAL GRASS

Artificial grass gives an opportunity to reduce costs and efficiency comparative to natural grass surface. Artificial grass has high quality characteristics and big term of usage.

It is used for professional sports, children playgrounds and landscape zones.

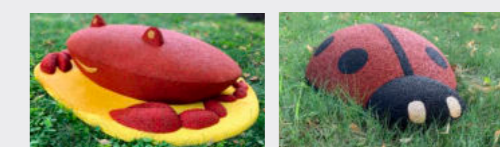

You can use it for all kinds of play sports: football, tennis, basketball, rugby, golf, volleyball, grass-hockey.

POLYURETHANE FIGURES

You can use polyurethane figures of manual production on the all kinds of playground for design, visual look and play activities.

They are made from EPDM rubber granules with the addition of polyurethane glue. They are compact, have straight surface, have good by touch sensations.

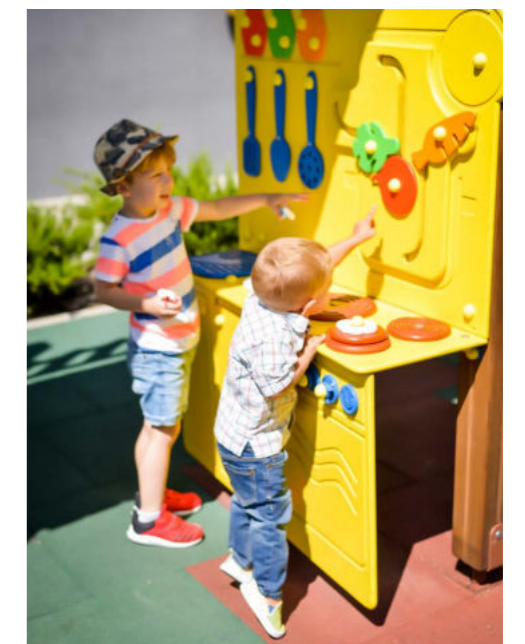

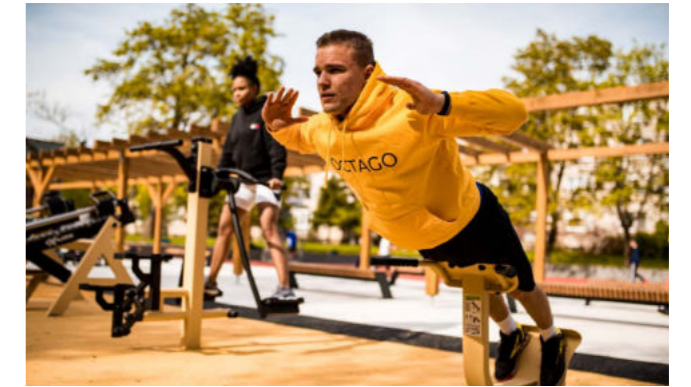

PROJECTS FOR PLAYGROUNDS

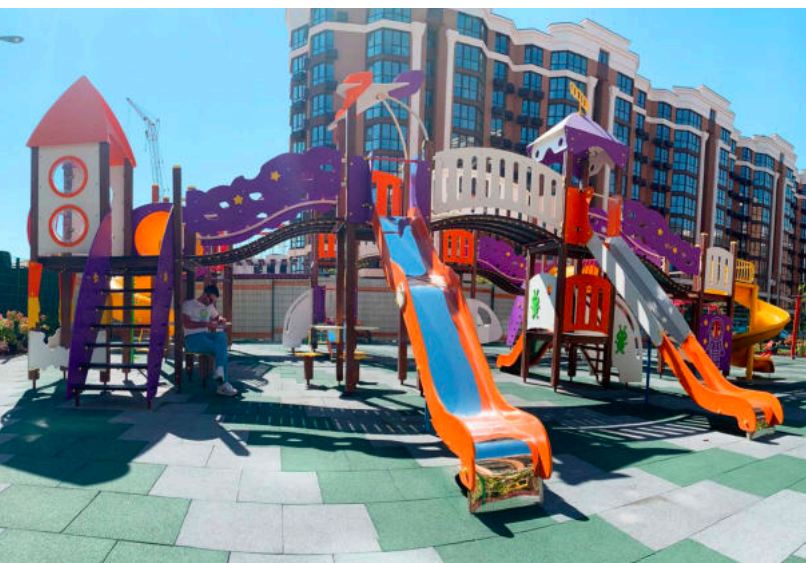

We can make projects of any children or sports playgrounds with calculation of safety requirements and the place of the object.

When we combine the equipment, we aim to make it safe, fun, action and entertainment for the users.
